RE: IPF JES

Dear Doctor,

We have randomly selected one of your patients (**NAME, number, dob**) as a potential case in IPF JES, a multicentre case-control study to investigate job exposures in IPF. The study involves a short interview to measure historic job exposures and a blood test to investigate susceptibility genetics. I enclose a one-page summary of the study together with the participant information sheet and would be happy to answer any questions you might have. Would you be happy to send a cover letter (attached) and information sheet to the patient? We would then hope to enrol them in the study at their next outpatient appointment.

Yours sincerely

Dr Carl Reynolds

A handwritten signature in black ink, appearing to read 'R Reynolds', with a large, sweeping flourish above the name.
